Motive 2.x

Official Documentation

Please follow these steps for each session:

1. Setup Motive Sessions
2. Calibrating the System
3. Setup the tracking suit
4. Setup the 6 rigidbody skeleton
5. Create a rigid body
6. Stream data
7. Record animations
8. Export animations

Installing Motive 1.8.0

Unfortunately it is not possible to have both applications running on the same system. they are actually installing incompatible drivers, so you have to

1. uninstall first the previous Motive (and don't forget the optitrack drivers!!),
2. restart the machine, and then
3. install the other Motive.
