

Course Description

In 1928, Oswald de Andrade published the “Cannibal Manifesto” (Manifesto Antropófago) that identified the principle of cultural appropriation as key to Brazilian culture. He wasn't the only one. Throughout the 20th century, numerous artistic movements – cubism and dada, music concrete and found-footage film, situationism, pop art, and appropriation art to name but a few - have worked with pre-existing cultural materials as an avant-garde practice. With the spread of digital media, we have surrounded ourselves with a near-infinite amount of cultural materials, easy to access, easy to manipulate, easy to distribute. Now, appropriation is the new normal in artistic practice, and new cultural genres are emerging from it, from popular meme culture to sampling in music, collaborative films, performative reenactments, and works of art for the white cube. In recent years, debates about the limits of ‘cultural appropriation have come to the forefront, questioning the power relationships inherent in acts of appropriation and sharply criticizing certain practices as racist or colonial. In this module, we will look at the history of appropriation as an artistic technique, focus on the practice of appropriation in the networked culture of the present and address the controversies around contemporary practices.

Course Requirements
