Arts at CERN

Zurich University of the Arts

MFA Art:ificial Studies

10-11 November 2026

Tuesday, 10 November 2026

13:45 Meet at CERN's Community Support Centre (Building 33)

14:00 Presentation Arts at CERN with Giulia Bini (Curator and Head of Arts at CERN)

15:00 Science Gateway with Giulia Bini and Pierre Korysko

CERN Science Gateway is a place to explore CERN and science through authentic, innovative and inspirational experiences. It is CERN's new education and outreach centre, where we take visitors on a unique journey building on the physical proximity to CERN, its accelerators, detectors, facilities and people.

16:00 End of the Tour

Wednesday, 11 November 2026

10:30 Meet at CERN's Community Support Centre (Building 33)

11:00 Data Centre with Antonella Del Rosso

The CERN Data Centre is the heart of CERN's entire scientific, administrative, and computing infrastructure. All services, including email, scientific data management and videoconferencing, use equipment based here. The 450 000 processor cores and 10 000 servers run 24/7.

12:30 LEIR/LINAC 2

LEIR (Low Energy Ion Ring) accelerates ions from the LINAC 3 to the Proton Synchrotron (PS) to provide ions for collisions within the Large Hadron Collider (LHC). LINAC2 (LINear ACcelerator 2) is the former initial proton injector in CERN's chain of acceleration.

14:00 End of the Tour

Documenting and Filming at CERN

Photography, filming, and audio recording are permitted throughout CERN, provided that third-party rights, including individuals' rights to their image and privacy, are respected.

If images taken at CERN will be used in a public project, please contact the Arts at CERN team so they can coordinate with the CERN Press Office regarding any required authorisation.

For any questions, please contact:
