

DOOM Eternal

Introduction

DOOM Eternal is a fast-paced first-person shooter developed by Id Software.

It is part of the DOOM series and it features a grand single-player campaign and a multiplayer mode.

In DOOM Eternal, you play as the DOOM Slayer, a man tormented by unrelenting bloodlust. You must protect the Earth from demons. Amongst other places, you venture to hell and back to achieve this feat.

Sound and especially music play a great role in this game. On one side, Mick Gordons Metal-Electro fusion soundtrack takes the stage, but the sound effects themselves also really help keep the players hyper-violent power fantasy alive.

Environment

Here are the different environmental soundscapes that DOOM Eternal uses to immerse the player. (Note that the actual corresponding soundscapes start only after a couple of seconds, and they switch between different locations inside the level)

Cultist Base
Mars Core
Arc Complex
Doom Hunter Base

Hell on Earth
Nekravol
Sentinel Prime
Super Gore Nest

Exultia
Final Sin
Taras Nabad
Urdak

Let's take a closer look at **Super Gore Nest** (that's the bottom middle one). Firstly, there's a faint sound of wind. Extremely distant howling and thunder create a sense of a big open space. Closer, you can hear some otherworldly sounds. These paint a picture of a soundstage that is near the listener: A soundstage that reminds of living and breathing flesh, pulsing. You can hear monsters growling, some closer and some further away.

The sounds of **Urdak** (bottom right) are also quite impressive. Synthesizers are used to give tones of „energy“. Repeating melodies of energetic arcs swing through the air. The atmosphere feels tense, charged with electricity.

A lot of DOOM Eternal's environments use sound to portray this uneasiness that is present through the game. Deep bass roars and shrill wind tones combine into a background sound that is inherently hostile; like everything is dead, except the beast below.
