# **DOOM Eternal**

## Introduction

**DOOM Eternal** is a fast-paced first-person shooter developed by Id Software.

It is part of the DOOM series and it features a grand singleplayer campaign and a multiplayer mode.

In DOOM Eternal, you play as the DOOM Slayer, a man tormented by unrelenting bloodlust. You must protect the Earth from demons. Amongst other places, you venture to hell and back to achieve this feat.

Sound and especially music play a great role in this game. On one side, Mick Gordons Metal-Electro fusion soundtrack takes the stage, but the sound effects themselves also really help keep the players hyper-violent power fantasy alive.

Genre:	First-person shooter
Release:	2020
Platforms:	Microsoft Windows, PlayStation 4, Stadia, Xbox One, Nintendo Switch, PlayStation 5, Xbox Series X/S
Developer:	id Software
Publisher:	Bethesda Softworks
Analysis by:	Michael Staub, Dorias Schärer

## Music

## **Environment**

Here are the different environmental soundscapes that DOOM Eternal uses to immerse the player. (Note that the actual corresponding soundscapes start only after a couple of seconds, and they switch between different locations inside the level)

Cultist Base
Mars Core
Arc Complex
Doom Hunter Base

Hell on Earth Nekravol Sentinel Prime Super Gore Nest Exultia Final Sin Taras Nabad Urdak

Let's take a closer look at **Super Gore Nest** (that's the bottom middle one). Firstly, theres a faint sound of wind. Extremely distant howling and thunder create a sense of a big open space. Closer, you can hear some otherwordly sounds. These paint a picture of a soundstage that is near the listener: A soundstage that reminds of living and breathing flesh, pulsing. You can hear monsters growling, some closer and some further away.

The sounds of **Urdak** (bottom right) are also quite impressive. Synthesizers are used to gives tones of "energy". Repeating melodies of energetic arcs swing through the air. The atmosphere feels tense, charged with electricity.

A lot of DOOM Eternal's environments use sound to portray this uneasiness that is present through the game. Deep bass roars and shrill wind tones combine into a background sound that is inherently hostile; like everything is dead, except the beast below.

### **Sound Effects**

UI

menu sounds.mp4

The **Menu Sounds** in the game are kept to minimal clicks.

#### Guns

shotgun.mp4

The **Shotgun** is the game's starting weapon. Using a weapon mod, you can also shoot sticky bombs with it (that's what's shown in the beginning. The S=shotguns reload sound does have some higher pitched components, making it feel and sound not as hefty as some of the other weapons, which is fitting since the shotgun is a weapon with relatively low damage.

assault rifle.mp4

The **Heavy Cannon** is a full-auto assault rifle. When hip-firing, the sound it creates consists of a higher pitched rattling (presumably from some kind of bullet-feeding chain) and of a loud bass

2025/09/19 19:44 3/4 DOOM Eternal

noise. When firing full auto, this bass illustrates the power behind each shot. When scoping in, you can hear a high pitched sound when the gun is done scoping in. This gives feedback to the player when the gun is ready to shoot. Finally, the shots while scoped in are deafeningly loud; so much so that the player doesn't even hear the bang to its full extent. This bang also travels outwards and echoes around the room and back to the player, really showing how loud it is.

plasma\_gun.mp4

The **Plasma Gun** has a bit of a different sound signature than the other guns. The upper and middle frequencies consist of this energetic "laser beam sound" that quickly sweeps from a high to a low pitch. Of course, once you fire full auto, the individual shots combine into a sort of chain. In the lower frequencies there is a fuzzy bass that gets especially prevalent once you stop shooting. After the Plasma Gun has fired enough shots, it can release a burst of energy. This is a bit less bassy, but after the sound starts high-pitched in the middle of the sound stage, it travels outwards and its pitch gets lower.

super\_shotgun.mp4

The **Super Shotgun** is a fan favourite and its sound design won't disappoint. The shot itself starts with loud bang that continues outwards as a thunderous roar. The shells are then ejected with a low-pitched plop. Finally, a clear mechanical click tells the player when the gun is ready to shoot again.
