Video

Beschreibung

«[w Duck Game](#) is 2D action video game that features shooting and platforming mechanics. The game has a single-player mode as well as local or online multiplayer with up to three other players.[3][4] The game has a simple premise, one hit and you are dead, last man standing wins the round, play to some target number of rounds (default is 10).[5][6] It features a relatively simple control scheme. Beyond moving your duck there are two buttons used to interact with weapons, one to pick up/throw a weapon, and another to use the weapon you are holding. The complexity in the game comes from the large assortment of weapons, and the varied environments you find yourself in. The game has several humorous elements which make it unique, including silly hats, a quack button, and a ragdoll button.
