1. GAME DESCRIPTION

Pikmin 3 is an atmospheric real-time strategy/puzzle game. You take on the role of three explorers from planet Koppai, who crash-landed on planet PNF-404 after they were sent there to search for resources. On your search for the missing pieces of your spaceship and food, you will be accompanied by various types of Pikmin. Pikmin are small creatures, native to that planet, who want to help you by attacking enemies or carrying various things, such as materials or food.
