Game Description

Sapiens is a sandbox „tribe leadership“ game made by a single developer called Dave Frampton (Majic Jungle). It is currently in early access.

It takes place on a simulated world, larger than the earth and you are free to choose your starting positions anywhere on the planet with varying challenges. The goal of the game is to build up a stone age civilization by researching new technologies and building houses, storage rooms, castles, palaces, pyramids and more with many different materials.

Multiplayer is currently not supported but will be in the future.

Objective Sound Analysis

Music

The music already provides a good feeling for the entire sounddesign of the game. it is calm, laid back and not all too loud.
