

Steering Our Craft, Theory 3, HS25

Overview

“*Steering our Craft*” proposes a theory class revolving around the writing practice in design. Working both individually and as a group, we will develop and refine our academic writing practice through inputs, readings, in-class writing and peer feedback sessions.

Taking inspiration by Ursula K. Le Guin’s *Steering the Craft* and her notion of writing as an inherently lonely practice that is nevertheless grounded in a community of peers. Through different perspectives on writing, we will intensify our awareness of our own process and continue to develop it.

In connection with the individual MA works, writing is understood as deeply entangled with design practice, becoming a tool for thinking, reflecting, shaping and mediating the work.

Assignment and Expectations

Together, we will work toward publishing a full design research paper on the [Research Catalogue](#), complemented by a printed zine that extends and amplifies the experimental and material side of the research paper.

Students are encouraged to treat writing and their MA thesis practice not as separate but as mutually beneficial and enriching. Through cycles of making, reflecting, and writing, we aim to strengthen both clarity and the depth of our research narratives.
