Human Colour Group

Abstracts

technisch

The visitor is grasped by webcam. By means of freely available facial recognition software (face.com-API's, geo-plugin, etc.) and accesses to on-line data banks (Picasa, Pathopic, Facebook, etc.) our software determines the following signs and projects them to the wall:

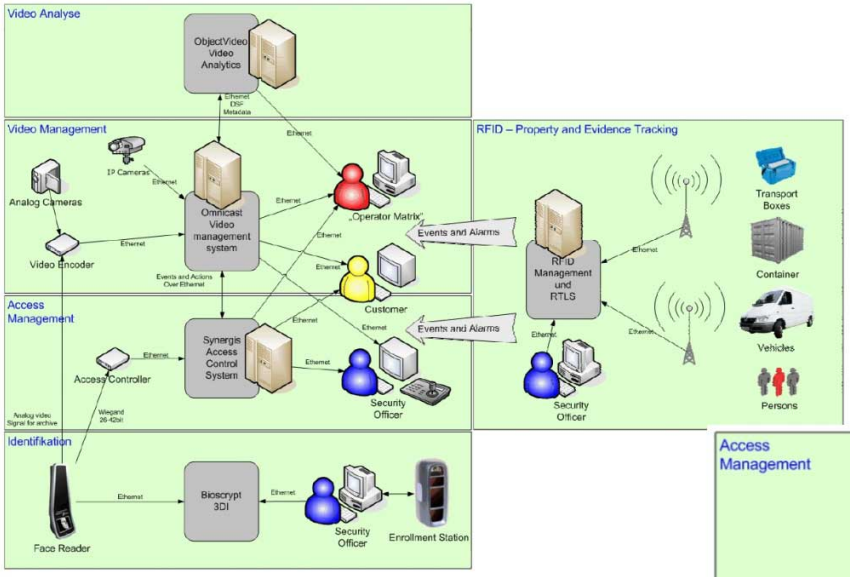

- name
- gender
- age
- size
- weight
- race
- state of mind
- denomination
- political disposition
- life expectancy
- ...
